A. Ticks
- Q. What is a drug which can only be purchased with a physician's order? THES 13.
A. Prescription Drugs
- Q. Which class of fire occurs in electrical wiring and electronic equipment? THES 10.
A. Class "C" fire
- Q. What vitamin helps your body utilize calcium better? THES 5.1
A. Vitamin D
- Q. Where does Tennessee rank in the nation for childhood obesity? THES 9.2
A. Fifth (5th) Highest!
- Q. What national organization issues weather watches and warnings? THES 11.
A. The National Weather Service
- Q. What is the meat from young dairy and beef calves? THES 5.1
A. Veal
- Q. What is the term for something that cannot be seen through? VA 2.1
A. Opaque
- Q. This part of the UT System does not have any undergraduate students but houses the UT School of Medicine and Dentistry? LSED
A. The University of Tennessee at Memphis
- Q. What is the name of an art work made by gluing different things down on a flat surface? VA 2.3
A. Collage
- Q. What is the name of an object made by hand from your own idea, skill and method? VA 1.3
A. Craft
- Q. What is a picture that is woven in cloth and hung on a wall? VA 1.3
A. Tapestry (pronounced TAP-ISS-TREE)

- Q. What class tornado would have winds of 100 miles per hour?
A. F-1 THES 11.
- Q. In what town is Tennessee Tech University located?
A. Cookeville LSED
- Q. Which type of cancer kills the most people in the United States?
A. Lung Cancer THES 9.2
- Q. How often should you have a dental check-up?
A. 2 times per year (every 6 months) THES 2.1
- Q. What type of drug produces sleep or stupor while at the same time relieving pain?
A. Narcotics THES 13.
- Q. What does the size of the lens opening of a camera effect?
A. Depth of field in focus VA 1.1
- Q. What is a list of dishes or foods served at a meal?
A. Menu THES 5.1
- Q. What is the largest voluntary health organization in the world?
A. American Cancer Society THES 9.2
- Q. Most fast foods are high in fat and what?
A. Sodium THES 5.1
- Q. What were "normal" schools?
A. Schools founded to train teachers LSED
- Q. What nutrient helps keep the body temperature at a normal level?
A. Water THES 5.1
- Q. What mineral helps the thyroid gland to work properly and is usually found in salt?
A. Iodine THES 5.1
- Q. What is the type of craft where you paint on a wooden surface?
A. Tole Painting VA 1.3
- Q. What single food item contributes the most dietary fat to the American diet?
A. Hamburger THES 5.1
- Q. What is the approximate size of a lightning bolt?
A. Only 3/4 inch THES 11.
- Q. What insect is spreading the West Nile Virus in this country?
A. Mosquito THES 9.2

- Q. What was the original name of East Tennessee State University?
A. East Tennessee State Normal School LSED
- Q. What are the building blocks of protein?
A. Amino Acids THES 5.1
- Q. What is made by putting many motifs together?
A. Pattern VA 2.3
- Q. What is the term for introducing an undesirable element?
A. Contamination THES 5.1
- Q. What state university was at one time University of Tennessee Junior College?
A. University of Tennessee at Martin (would accept simply UT-Martin) LSED
- Q. What is the device in a camera that opens and closes causing the film to be exposed forming an image?
A. Shutter VA 1.1
- Q. To prevent concussions when cycling, what piece of equipment should you wear?
A. Helmet THES 10.
- Q. What is the name of the three-legged supporting stand used to hold a camera steady?
A. Tripod VA 1.1
- Q. What began in 1775, when the French Government offered a prize for a new method of preserving foods?
A. Canning THES 5.1
- Q. What is a "PFD" as it relates to safety?
A. A Personal Flotation Device THES 10.
- Q. What is defined as a substance that, when put into your body, can alter the way your body works?
A. Drugs THES 13.
- Q. What is skim milk?
A. Whole milk with the fat or cream removed THES 5.1
- Q. What state university in Tennessee changed its name in 1994?
A. University of Memphis from Memphis State University LSED
- Q. What is the term for the exceptionally high tides which accompany hurricanes causing much damage?
A. Storm Surge THES 11.
- Q. Tusculum College, Tennessee's oldest college, is how much older than the University of Tennessee?
A. One Day! (Tusculum founded on Sept. 9, 1794 and the University of Tennessee on Sept. 10, 1794) LSED

- Q. What Tennessee university is located near Sewanee, Tennessee?
A. The University of the South LSED
- Q. Americans get most of their sodium intake from what ingredient added to foods during processing?
A. Salt THES 5.1
- Q. What is the light proof area used for processing film?
A. Darkroom VA 1.1
- Q. What are the two readings given in a blood pressure?
A. Systolic (pronounced SISS-TAH-LIC) and Diastolic (pronounced DIE-ISS-TAH-LIC) THES 9.2
- Q. What type of fat is liquid at room temperature?
A. Unsaturated THES 5.1
- Q. What is the term for the outer edges of a flat surface?
A. Shape VA 2.1
- Q. What university in Tennessee was originally known as Grant University?
A. UT Chattanooga LSED
- Q. What state university was first named Hall-Moody Institute?
A. University of Tennessee at Martin (would accept simply UT-Martin) LSED
- Q. Emergency responders pay close attention to NOAA weather radio reports in preparing for emergencies. What does NOAA stand for?
A. the National Oceanic and Atmospheric Administration THES 11.
- Q. Which tornado would be more dangerous an F-1 or an F-5?
A. F-5 THES 11.
- Q. When mowing on slopes with a push mower, in which direction should you mow?
A. Across the slope THES 10.
- Q. What is the term for the way a surface feels when touched?
A. Texture VA 2.1
- Q. Foods high in soluble fiber can lower what substance in your blood?
A. Cholesterol THES 5.1
- Q. What type drug speeds up the central nervous system?
A. Stimulant THES 13.
- Q. What is the maximum time that left-overs can be left out at room temperature?
A. Two (2) hours THES 5.1
- Q. What natural occurrence kills the most people in the United States?
A. Lightning THES 11.

- Q. What nutrient builds bones and teeth?
A. Calcium THES 5.1
- Q. What is a substance that prevents bacterial growth called?
A. Antibiotic THES 9.2
- Q. Which boat has the right of way...a motor boat or a sail boat?
A. The sail boat THES 10.
- Q. What is a combination of colors that lie next to each other on the color wheel called?
A. Analogous or Related (UH-NAL-UH-GUS) VA 2.1
- Q. What is the photographic term for taking a picture with no flash?
A. Existing light photography VA 2.3
- Q. What state university was at one time known as "T P I"?
A. Tennessee Tech University LSED
- Q. What food group do dry beans fit into?
A. Meat group THES 5.1
- Q. Which class of fire involves wood, cloth, and paper?
A. Class "A" fire THES 10.
- Q. In what direction do Tornados generally travel?
A. Northeast THES 11.
- Q. At what wind speed does a tropical storm become a hurricane?
A. Above 74 mph THES 11.
- Q. What was the first of the "normal" schools to enroll students?
A. Middle Tennessee Normal School LSED
- Q. What is the term for a disease that is transmitted to humans by food?
A. Foodborne Illness THES 5.1
- Q. What state university was first named West Tennessee State Normal School?
A. University of Memphis LSED
- Q. What harmful substance is in the paint of most houses built before 1960?
A. Lead THES 10.
- Q. What is the method of drawing done without any help from any drawing instruments?
A. Freehand VA 1.3
- Q. What is a chemical compound essential to good nutrition and bone structure?
A. Mineral THES 5.1

- Q. What is the term for the reduction in the size of particles suspended in a liquid by the use of high pressure? THES 5.1
A. Homogenization (pronounced HUM-AH-GIN-UH-ZAY-SHUN)
- Q. What is the most common stitch on a sewing machine? VA 2.1
A. Straight Stitch
- Q. Exercise makes your bones what? THES 4.1
A. Stronger
- Q. What is the normal resting heart rate (heart beats per minute)? THES 4.1
A. 60 to 90
- Q. Which school in the University of Tennessee system is located in East Tennessee? LSED
A. The University of Tennessee at Knoxville
- Q. In sewing, what is pivoting? VA 2.1
A. Turning a corner
- Q. What is defined as the ratio of lean body weight to fat body weight? THES 5.1
A. Body composition
- Q. What is the tool used to study color schemes? VA 2.1
A. The Color Wheel
- Q. What type drug can be bought without a physician's order? THES 13.
A. Over-the-Counter Drug
- Q. What is the nutrient needed to prevent anemia? THES 5.1
A. Iron
- Q. Which state university traces its origins to Blount College founded in 1794? LSED
A. The University of Tennessee
- Q. Which school in the University of Tennessee system is located in West Tennessee? LSED
A. The University of Tennessee at Martin
- Q. What is the term for the passing of nutrients into the blood stream? THES 5.1
A. Absorption
- Q. What is the grain from which flour is made? THES 5.1
A. Wheat
- Q. Which school in the University of Tennessee system is located in Southeast Tennessee? LSED
A. The University of Tennessee at Chattanooga
- Q. What is the first thing you should do upon arriving on the scene of an accident? THES 11.
A. Secure the scene or make sure the danger is removed or corrected

- Q. Jogging would be considered what type of exercise? THES 4.1
A. Aerobic Exercise
- Q. What can be defined as a style that gains sudden popularity and declines quickly? THES 13.
A. Fad
- Q. What is the most important tool you have to prevent foodborne illness? THES 2.1
A. Good personal hygiene
- Q. What is the term for something which can be seen through clearly, like glass? VA 2.1
A. Transparent
- Q. What university in Tennessee was originally known as Dixie College? LSED
A. Tennessee Tech University
- Q. What is defined as the influence your contemporaries or friends have upon you? THES 13.
A. Peer Pressure
- Q. What is the name for vitamin B1? THES 5.1
A. Thiamin (pronounced THY UH MUN)
- Q. A tornado with wind speeds of 300 miles per hour would be considered what class tornado? THES 11.
A. F-5
- Q. What is the first responsibility of any baby sitter? THES 10.
A. Safety of the child
- Q. What is the main use of an emery bag on a pin cushion? VA 1.1
A. To keep needles and pins sharp
- Q. What disease did Jonas Salk eradicate with his vaccine? THES 9.2
A. Polio
- Q. In sewing, what is the guide or directions for making a specific garment called? VA 2.3
A. Pattern
- Q. As it relates to clothing, why do we use pinking shears? VA 1.1
A. Cutting zig-zag edges on cloth to prevent fraying
- Q. Name the only state university in Tennessee named for a former governor? LSED
A. Austin Peay State University
- Q. If you add white to a color, you change the color's what? VA 2.1
A. Tint
- Q. What type painting is the hardest to clean-up? VA 1.2
A. Oil Painting

- Q. What kind of paint is made of powder mixed with glue and water?
A. Tempera
VA 1.2
- Q. What do the letters C P R stand for?
A. Cardiopulmonary Resuscitation (pronounced CAR-DEE-O-PULL-MON-AIR-EE REE-SUS-UH-TAY-SHUN)
THES 10.
- Q. What 3 pieces of equipment make up the work triangle in the kitchen?
A. Stove, Sink, Refrigerator
THES 5.1
- Q. What is the term for the main object you want in your photograph?
A. Subject
VA 2.3
- Q. What is the cancer causing radioactive gas that can seep into your home from underground?
A. Radon
THES 9.2
- Q. What term refers to the brightness or dullness of a color?
A. Intensity
VA 2.3
- Q. U. T. was officially named the University of Tennessee in 1879. What was its' name immediately prior to this change?
A. East Tennessee University
LSED
- Q. What is the term for the removal of water from food?
A. Dehydrated
THES 5.1
- Q. One gram of fat contains how many calories?
A. 9
THES 5.1
- Q. What does the term rancid mean?
A. Offensive smell (It STINKS!)
THES 5.1
- Q. In what town is Middle Tennessee State University located?
A. Murfreesboro
LSED
- Q. What is the name given to an earthquake which follows another earthquake?
A. An Aftershock
THES 11.
- Q. What does the term linear mean?
A. Consisting of lines
VA 2.1
- Q. What is the leading cause of infant deaths in Tennessee?
A. Low birth weight
THES 9.2
- Q. What is used in sewing to give shape to a garment by rounding flat fabric to fit curves?
A. Darts
VA 1.3
- Q. What is the term used to describe two images taken at different times appearing on the same photograph?
A. Double exposure
VA 1.3

- Q. What is an ingredient that helps make bread tender?
A. Shortening THES 5.1
- Q. What type nutrient in food provides energy to the body?
A. Carbohydrates THES 5.1
- Q. What is the term used for when a liquid becomes a soft semi-solid mass?
A. Coagulate THES 5.1
- Q. What radar system has greatly improved the forecasting of tornados?
A. Doppler THES 11.
- Q. What is the statement issued when a Tornado has been spotted?
A. Tornado Warning THES 11.
- Q. Your body turns extra protein into what?
A. Fat THES 5.1
- Q. What is the recommended amount of exercise time a child or teenager should get daily?
A. 60 minutes (revised with 2005 new Food Guide Pyramid) THES 4.1
- Q. How long does it take the sound of thunder to travel a mile?
A. 5 seconds THES 11.
- Q. Concerning interior design, what is the meaning of the word emphasis?
A. Center of interest VA 2.3
- Q. What type of accident causes the most deaths in the United States?
A. Motor Vehicles THES 10.
- Q. What is the proper name for deer meat?
A. Venison THES 5.1
- Q. What is the safest method to defrost frozen foods?
A. In the refrigerator THES 5.1
- Q. What color is defined as a pale or light purple?
A. Lavender or Lilac VA 2.1
- Q. At what temperature should cold foods be stored?
A. 40° F or colder THES 5.1
- Q. The color teal is defined as what?
A. Dark greenish blue VA 2.1
- Q. Name the two types of dietary fiber?
A. Soluble and Insoluble THES 5.1

- Q. What does the term motif mean? VA 2.1
A. A single design unit which can be repeated
- Q. In what town is Austin Peay State University located? LSED
A. Clarksville
- Q. At what temperature should your refrigerator be set? THES 5.1
A. Between 32 degrees and 40 degrees Fahrenheit
- Q. Carbohydrates provide how many calories per gram. THES 5.1
A. 4
- Q. What is an unplanned event that usually results in an injury or damage? THES 10.
A. Accident
- Q. What are proteins in food which aid in the maturing of food? THES 5.1
A. Enzymes
- Q. How are ingredients on a food label listed by nutritional importance? THES 5.1
A. From most to least
- Q. What machine has a needle bar, a throat plate, and a bobbin? VA 1.1
A. Sewing machine
- Q. Which class of fire involves flammable liquids, gases, oil and grease? THES 10.
A. Class "B" fire
- Q. What kind of camera lens can bring your subject closer to you? VA 1.1
A. Telephoto
- Q. When studying colors, what are colors called that contain blue? VA 2.1
A. Cool Colors
- Q. What is the phone number for the Tennessee Poison Control Center? THES 11.
A. 1-800-222-1222 or 1-423-222-1222
- Q. What Tennessee city is the home of UTC? LSED
A. Chattanooga (University of Tennessee at Chattanooga)
- Q. What vitamin is called the "Sunshine" vitamin? THES 5.1
A. Vitamin C (because citrus fruits are a good source of Vitamin C) (also will accept Vitamin D because the body produces Vitamin D when sunlight is absorbed by the skin)
- Q. What are you required by Tennessee state law to do each time you ride in a car? THES 10.
A. Wear seat belt
- Q. What is the nutrient of food needed to build and repair body tissues? THES 5.1
A. Protein

- Q. What is the term for adding a desirable substance to a food increasing the food value? THES 5.1
A. Fortified
- Q. What is the term for predicting what the weather will do? THES 11.
A. Forecasting
- Q. In what town is East Tennessee State University located? LSED
A. Johnson City
- Q. What current university was at one time known as Tennessee A & I State Normal College? LSED
A. Tennessee State University
- Q. What are colors called that are opposite each other on the color wheel? VA 2.1
A. Complementary or Contrasting
- Q. What is the term used to describe the weaving together of three or more cords, wires or string? VA 1.3
A. Braid
- Q. What is the unit by which food energy is measured? THES 5.1
A. Calorie
- Q. What percent of traffic accidents are alcohol related? THES 13.
A. 60 percent
- Q. What is the recommended amount of time for proper handwashing? THES 2.1
A. 20 seconds
- Q. What Nashville university is located on the grounds of the former home of Adelia Acklen?
(Pronounced ADD-UH-LEE-SH-UH ACK-LYNN) LSED
A. Belmont
- Q. How many teaspoons of sugar does a typical 12 ounce can of carbonated soft drink contain? THES 5.1
A. 10
- Q. What is the term for the drying out of frozen food that has been improperly packaged? THES 5.1
A. Freezer Burn
- Q. By law, a beverage that is called a “fruit juice” must contain at least what percent of natural fruit THES 5.1
juices?
A. 10
- Q. If you add black to a color to make it darker, you are changing the color's what? VA 2.1
A. Shade
- Q. What can be added to fruit to prevent it from browning in the freezer? THES 5.1
A. Ascorbic Acid (pronounced AS-SCORE-BIC)
- Q. At what temperature should your home freezer be set on? THES 5.1
A. 0 degrees Fahrenheit

- Q. What should be dialed in case of emergency?
A. 911 THES 11.
- Q. What is the part of the scene that appears behind the subject in a photograph?
A. Background VA 2.1
- Q. What is the addictive agent found in Tobacco?
A. Nicotine THES 13.
- Q. What type camera lens allows you to frame more area from right to left?
A. Wide-angle lens VA 1.1
- Q. In canning, what is the space left at the top of the container called?
A. Head Space THES 5.1
- Q. At what time of the day do most lightning deaths occur?
A. Afternoon THES 11.
- Q. What scale is used to classify a tornado?
A. Fujita Scale (pronounced FEW GEE TA) THES 11.
- Q. What is the name of a paper or board with openings that let paint or ink through to make a design?
A. Stencil VA 1.1
- Q. What is the number one state in the United States for SPAM consumption?
A. Hawaii THES 5.1
- Q. What method of cooking comes from the French word meaning "to jump" and is usually done to onions and mushrooms?
A. Saute (pronounced SAW-TAY) THES 5.1
- Q. What is the statement issued when conditions are favorable for a Tornado to occur?
A. Tornado Watch THES 11.
- Q. What is the material called that gives fabric body and shaping?
A. Interfacing VA 2.3
- Q. Dietary guidelines recommend that persons obtain at least what percent of their daily calories from carbohydrates?
A. 50 THES 5.1
- Q. In emergency preparedness, what do we call the circular diagram containing the words: Prepare, Respond, Recover, Mitigate?
A. The Disaster Cycle THES 11.
- Q. Where is the University of Tennessee Space Institute located?
A. Tullahoma LSED

- Q. What is the term for the exposing of a liquid to high temperatures allowing for the destruction of harmful organisms without major chemical changes to the substance? THES 5.1
- A. Pasteurization (pronounced PASS-TER-UH-ZAY-SHUN)

- Q. A remora cleaning the surface of a shark while benefiting from the protection of the shark could be described as what kind of relationship? 6.LS2.2
A. Mutualism (Pronounced MUE-CHEW-UL-IZM)
- Q. What does it mean for an animal to be at the top of the food chain? 6.LS2.2
A. No other animal in the ecosystem preys on it. (Would also accept Apex Predator)
- Q. What is the chemical used in a liquid-in-glass thermometer to measure temperature? 6.ESS2.5
A. Mercury
- Q. Oxygen is an example of what type of natural resource? 6.ESS3.1
A. Renewable
- Q. What is an organism which breaks down dead or decaying organisms? 6.LS2.3
A. A decomposer
- Q. What instrument is used to determine the atmospheric pressure? 6.ESS2.5
A. Barometer (pronounced BA-ROM-UH-TER)
- Q. A basketball passing through a hoop is an example of what kind of energy? 4.PS3.2
A. Kinetic Energy
- Q. Where would you find the boiling point of water to be higher than normal? 6.ESS2.5
A. at places below sea-level
- Q. What is the term for the planned management of a natural resource? 6.ESS3.1
A. Conservation (CON-SUR-VAY-SHUN)
- Q. What Law states that energy cannot be created or destroyed, but only transformed from one form to another? 4.PS3.3
A. Law of Conservation of Energy
- Q. The heat from the cocoa making the cup hot in your hands is a good example of what? 6.PS3.4
A. Conduction (CON-DUCK-SHUN)
- Q. What is the main reason an organism in an ecosystem becomes over populated? 6.LS2.2
A. Lack of Predation
- Q. Name the three types of organisms found in any biological community? 6.LS2.3
A. Consumer, Producer, Decomposer
- Q. What state of matter assumes the volume of the part of the container which it occupies? 5.PS1.1
A. A Liquid
- Q. Water behind a dam is an example of what kind of energy? 4.PS3.2
A. Potential Energy
- Q. The California Current moves in what general direction along the western coast of North America? 6.ESS2.3
A. South

- Q. What is defined as a biological interaction where both organisms or species are harmed?
A. Competition 6.LS2.2
- Q. Which type of natural resource would take longer to replenish?
A. Nonrenewable 6.ESS3.1
- Q. Which side of a mountain generally gets less rain?
A. Eastern Slope 6.ESS2.3
- Q. Which side of a mountain generally gets more rain?
A. Western Slope 6.ESS2.3
- Q. What is the energy possessed by a body by virtue of its movement?
A. Kinetic Energy 4.PS3.2
- Q. What is the relationship in which both organisms benefit from the relationship?
A. Mutualism (Pronounced MUE-CHEW-UL-IZM) 6.LS2.2
- Q. What is defined as the temperature to which the air would have to be cooled to condense as moisture on surfaces such as plant leaves?
A. Dew Point 6.ESS2.5
- Q. A fast car moving down the road is an example of what kind of energy?
A. Kinetic Energy 4.PS3.2
- Q. What is the term for the animal that is caught and eaten by another organism?
A. Prey 4.LS2.2
- Q. What happens when heat is transferred through air or water by a hotter material moving into a cooler place?
A. Convection (CON-VECK-SHUN) 6.PS3.4
- Q. The Rainforest in Brazil would be an example of what type of Biome?
A. Terrestrial 6.LS2.4
- Q. What atmospheric pressure are you experiencing during a rainstorm?
A. Low Pressure 6.ESS2.5
- Q. Trees are an example of what type of natural resource?
A. Renewable 6.ESS3.1
- Q. Water behind a dam is an example of what kind of energy?
A. Potential Energy 4.PS3.2
- Q. Why is the California Current cold?
A. Because it is bringing in cooler water from the North 6.ESS2.3
- Q. What are stream-like movements of water in the ocean called/
A. currents 6.ESS2.1

- Q. What state of matter would you have if all of the atoms are tightly packed in a regular pattern? 5.PS1.1
A. A Solid
- Q. What is defined as a community of plants and animals that have common characteristics for the environment they exist in? 6.LS2.4
A. A Biome
- Q. What is an organism which lives in or on another organism and benefits at the hosts expense? 4.LS2.2
A. Parasite
- Q. What are two major types of biomes? 6.LS2.4
A. Terrestrial and Aquatic
- Q. What state of matter would you have if all of the atoms are close together with no regular arrangement? 5.PS1.1
A. A Liquid
- Q. What is the movement of heat through a material without any perceptible motion of the material? 6.PS3.4
A. Conduction (CON-DUCK-SHUN)
- Q. Stored energy in an object because of its position is know as what? 4.PS3.2
A. Potential Energy
- Q. Which type of Potential Energy occurs when objects are compressed or stretched? 6.PS3.10
A. Elastic Potential Energy
- Q. Natural Gas is an example of what type of natural resource? 6.ESS3.1
A. Nonrenewable
- Q. In terms of what they eat, a humans would be classified as what? 4.LS2.2
A. Omnivores (pronounced OM-NUH-VOORS)
- Q. What simple type of anemometer was used on the Phoenix Mars Lander? 6.ESS2.5
A. Ping Pong Ball Anemometer
- Q. What instrument is used to determine the temperature of water? 6.ESS2.5
A. Thermometer
- Q. What is the term for an animal which sits at the top of the food chain? 6.LS2.2
A. Apex Predator
- Q. What is the term for the animal that is catches and eats another animal? 4.LS2.2
A. Predator
- Q. One Astronomic Unit is defined as the average distance between what two places? 607.6.3
A. The Earth and the Sun
- Q. Which type of natural resource can be replenished by human management? 6.ESS3.1
A. Renewable

- Q. Lake Michigan would be an example of what type of Biome?
A. Aquatic 6.LS2.4
- Q. How is relative humidity expressed?
A. Percentage 6.ESS2.5
- Q. What is term for energy traveling through space or matter in the form of energy waves or particles?
A. Radiation (Pronounced RADE-E-A-SHUN) 6.PS3.4
- Q. An organism which is attacked in some way by a parasite is know as a what?
A. A Host 4.LS2.2
- Q. Petroleum is an example of what type of natural resource?
A. Nonrenewable 6.ESS3.1
- Q. What type of organism must consume materials generated by other organisms in order to survive?
A. Consumer 4.LS2.2
- Q. Major ocean currents move in what direction in the northern hemisphere?
A. Clockwise 6.ESS2.3
- Q. What state of matter has a fixed volume and shape?
A. Solid 5.PS1.1
- Q. What Law states that energy cannot be created or destroyed, but only transformed from one form to another?
A. Law of Conservation of Energy 4.PS3.3
- Q. What is a biological community of interacting organisms?
A. An ecosystem 6.LS2.2
- Q. Which two gasses make up the greatest percentage of the atmosphere of the Earth?
A. Oxygen and Nitrogen 7.ESS3.1
- Q. What is the energy possessed by a body by vitue of its movement?
A. Kinetic Energy 4.PS3.2
- Q. In terms of a biome, animals, plants, and fungi would be clasified as what type of factor?
A. Biotic (Pronounced BY-OTT-TICK) 6.LS2.4
- Q. A basketball passing through a hoop is an example of what kind of energy?
A. Kinetic Energy 4.PS3.2
- Q. What is defined as the biological interaction of one animal eating another?
A. Predation 6.LS2.2
- Q. Which type of Potential Energy is determined by its electrical charge?
A. Electric Potential Energy 6.PS3.10

- Q. Major ocean currents move in what direction in the southern hemisphere? 6.ESS2.3
A. Counter Clockwise
- Q. What is the relationship in which one organism benefits from the relationship while the other is neither harmed or benefited? 6.LS2.2
A. Commensalism (Pronounced CUH-MINCE-UH-LIZM)
- Q. What is the weather termed for the amount of water vapor found in the atmosphere? 6.ESS2.5
A. Humidity
- Q. What states of matter are not easily compressed? 5.PS1.1
A. Solid and Liquid
- Q. What instrument is used to determine the air temperature? 6.ESS2.5
A. Thermometer
- Q. A coiled spring would be an example of what kind of energy? 4.PS3.2
A. Potential Energy
- Q. How would you describe the relationship between a tick and a dog? 6.LS2.2
A. Parasitism (Pronounced PARA- SIT-IZM)
- Q. In terms of an ecosystem what is a producer? 4.LS2.2
A. An organism which can produce its own food
- Q. What instrument is used to measure the speed of the wind? 6.ESS2.5
A. Anemometer (Pronounced ANN-O-MOM-UH-TER)
- Q. Coal is an example of what type of natural resource? 6.ESS3.1
A. Nonrenewable
- Q. What state of matter would you have if all of the atoms vibrate but generally do not move from place to place? 5.PS1.1
A. A Solid
- Q. What state of matter assumes the volume of its container? 5.PS1.1
A. A Gas
- Q. What instrument is used to determine the pressure of the atmosphere? 6.ESS2.5
A. Barometer (pronounced BA-ROM-UH-TER)
- Q. Why is the Gulf Stream warm? 6.ESS2.3
A. Because it is bringing in warmer water from the South
- Q. What instrument is used to determine the amount of humidity present in the atmosphere? 6.ESS2.5
A. Psychrometer or Hygrometer (Pronounced SI-Krom-uh-ter and HI- GROM-UH-TER)
- Q. A fast car moving down the road is an example of what kind of energy? 4.PS3.2
A. Kinetic Energy

- Q. What animal is considered to be the apex predator on earth? 6.LS2.2
A. Man
- Q. What state of matter would you have if all of the atoms vibrate and move about, and slide past each other? 5.PS1.1
A. A Liquid
- Q. Which type of Potential Energy depends upon its mass? 6.PS3.10
A. Graviational Potential Energy
- Q. What atmospheric pressure are you experiencing during a bright sunny day? 6.ESS2.5
A. High Pressure
- Q. What is defined as air in motion? 607.8.2
A. Wind
- Q. In terms of a biome, water, air and soil would be claasified as what type of factor? 6.LS2.4
A. Abiotic (Pronounced A-BY-OTT-TICK)
- Q. An ecological area inhabited by a particular species of animal or plant is said to be its what? 6.LS2.4
A. Habitat
- Q. What is another term for Mutulism? 6.LS2.2
A. Symbiotic (Pronounced SIM-BY-AH-TIC)
- Q. What major ocean current effects the weather in the Atlantic particulary along the eastern North American coast? 6.ESS2.3
A. The Gulf Stream
- Q. What state of matter would you have if all of the atoms are well seperated with no regular arrangement? 5.PS1.1
A. A Gas
- Q. What state of matter does not flow easily? 5.PS1.1
A. A Solid
- Q. Where would you find the boiling point of water to be lower than normal? 6.ESS2.5
A. At higher elevations or altitudes
- Q. What is the term for a gravity effected trajectory of an objected around a planet? 607.6.3
A. Orbit
- Q. Solar Energy is an example of what type of natural resource? 6.ESS3.1
A. Renewable
- Q. What major ocean current effects the weather in the Pacific particulary along the western North American coast? 6.ESS2.3
A. The California Curret

- Q. Which type of natural resource can be used repeatedly and is replaced naturally? 6.ESS3.1
A. Renewable
- Q. What is another term for moon? 607.6.3
A. Satellite
- Q. A coiled spring would be an example of what kind of energy? 4.PS3.2
A. Potential Energy
- Q. A flea that lives on a dog would be considered to be what? 6.LS2.2
A. A parasite
- Q. What states of matter assume the shape of their container? 5.PS1.1
A. Gas and Liquid
- Q. What is a simple definition for Biotic? 6.LS2.4
A. Something Living
- Q. The Gulf Stream moves in what general direction along the Atlantic coast? 6.ESS2.3
A. North
- Q. What is a simple definition for Abiotic? 6.LS2.4
A. Non-Living
- Q. What is the term for an object that orbits around a planet? 607.6.3
A. A Satellite or Moon
- Q. What is defined as the force exerted on the atmosphere at any given point? 6.ESS2.5
A. Atmospheric or Barometric Pressure (Pronounced BEAR-O-MET-TRICK)
- Q. Hot water in a pot rising as cold water sinks causing a circular current is a good example of what? 6.PS3.4
A. Convection (CON-VECK-SHUN)
- Q. Stored energy in an object because of its position is know as what? 4.PS3.2
A. Potential Energy
- Q. What is the relationship in which one organism benefits from the reationship while the other is harmed? 6.LS2.2
A. Parasitism (Pronounced PARA- SIT-IZM)
- Q. Which type of natural resource can only be conserved by human management? 6.ESS3.1
A. Nonrenewable
- Q. Fresh water is an example of what type of natural resource? 6.ESS3.1
A. Renewable
- Q. What state of matter would you have if all of the atoms vibrate and move freely at high speeds? 5.PS1.1
A. A Gas

- Q. What state of matter can be easily compressed?
A. A Gas

5.PS1.1
