A. Temperatures between 40 and 140 degrees Fahrenheit (where bacteria multiply fastest)
- Q. Jogging would be considered what type of exercise? THES 4.1
A. Aerobic Exercise
- Q. In canning, what is the space left at the top of the container called? THES 5.1
A. Head Space
- Q. What are you required by Tennessee state law to do each time you ride in a car? THES 10.
A. Wear seat belt
- Q. What is the part of the scene that appears behind the subject in a photograph? VA 2.1
A. Background
- Q. What is the name of the three-legged supporting stand used to hold a camera steady? VA 1.1
A. Tripod
- Q. What is a combination of colors that lie next to each other on the color wheel called? VA 2.1
A. Analogous or Related (UH-NAL-UH-GUS)
- Q. What is the approximate size of a lightning bolt? THES 11.
A. Only 3/4 inch
- Q. How long does it take the sound of thunder to travel a mile? THES 11.
A. 5 seconds
- Q. What is skim milk? THES 5.1
A. Whole milk with the fat or cream removed
- Q. What is the term for the passing of nutrients into the blood stream? THES 5.1
A. Absorption
- Q. By law, a beverage that is called a “fruit juice” must contain at least what percent of natural fruit juices? THES 5.1
A. 10

- Q. What Tennessee city is the home of UTC?
A. Chattanooga (University of Tennessee at Chattanooga) LSED
- Q. What were "normal" schools?
A. Schools founded to train teachers LSED
- Q. What do azalea, iris, and holly have in common?
A. They are common house plants which are poisonous THES 11.
- Q. What natural occurrence kills the most people in the United States?
A. Lightning THES 11.
- Q. How many teaspoons of sugar does a typical 12 ounce can of carbonated soft drink contain?
A. 10 THES 5.1
- Q. Which tornado would be more dangerous an F-1 or an F-5?
A. F-5 THES 11.
- Q. What happened to the University of Tennessee at Nashville?
A. It is now part of Tennessee State University LSED
- Q. What is the number one state in the United States for SPAM consumption?
A. Hawaii THES 5.1
- Q. What group of diseases is characterized by uncontrolled growth and spread of abnormal cells?
A. Cancer THES 9.2
- Q. What is the grain from which flour is made?
A. Wheat THES 5.1
- Q. Your body turns extra protein into what?
A. Fat THES 5.1
- Q. What scale is used to classify a tornado?
A. Fujita Scale (pronounced FEW GEE TA) THES 11.
- Q. This part of the UT System does not have any undergraduate students but houses the UT School of Medicine and Dentistry?
A. The University of Tennessee at Memphis LSED
- Q. What is an ingredient that helps make bread tender?
A. Shortening THES 5.1
- Q. What single food item contributes the most dietary fat to the American diet?
A. Hamburger THES 5.1
- Q. What is the name of a paper or board with openings that let paint or ink through to make a design?
A. Stencil VA 1.1

- Q. What are the building blocks of protein? THES 5.1
A. Amino Acids
- Q. What kind of camera lens can bring your subject closer to you? VA 1.1
A. Telephoto
- Q. What is the cancer causing radioactive gas that can seep into your home from underground? THES 9.2
A. Radon
- Q. Tusculum College, Tennessee's oldest college, is how much older than the University of Tennessee? LSED
A. One Day! (Tusculum founded on Sept. 9, 1794 and the University of Tennessee on Sept. 10, 1794)
- Q. What type painting is the hardest to clean-up? VA 1.2
A. Oil Painting
- Q. The color teal is defined as what? VA 2.1
A. Dark greenish blue
- Q. What is the name of an object made by hand from your own idea, skill and method? VA 1.3
A. Craft
- Q. What is the photographic term for taking a picture with no flash? VA 2.3
A. Existing light photography
- Q. What is the maximum time that left-overs can be left out at room temperature? THES 5.1
A. Two (2) hours
- Q. Which school in the University of Tennessee is located in East Tennessee? LSED
A. The University of Tennessee at Knoxville
- Q. At what temperature should your home freezer be set on? THES 5.1
A. 0 degrees Fahrenheit
- Q. If you add white to a color, you change the color's what? VA 2.1
A. Tint
- Q. What are proteins in food which aid in the maturing of food? THES 5.1
A. Enzymes
- Q. What is the unit by which food energy is measured? THES 5.1
A. Calorie
- Q. What disease did Jonas Salk eradicate with his vaccine? THES 9.2
A. Polio
- Q. What is the term used for when a liquid becomes a soft semi-solid mass? THES 5.1
A. Coagulate

- Q. Dietary guidelines recommend that persons obtain at least what percent of their daily calories from carbohydrates? THES 5.1
A. 50
- Q. What is the main use of an emery bag on a pin cushion? VA 1.1
A. To keep needles and pins sharp
- Q. What type drug can be bought without a physician's order? THES 13.
A. Over-the-Counter Drug
- Q. What machine has a needle bar, a throat plate, and a bobbin? VA 1.1
A. Sewing machine
- Q. What is the term for getting all of your subject in the photograph? VA 2.3
A. Framing your subject
- Q. What food group do dry beans fit into? THES 5.1
A. Meat group
- Q. In what town is Middle Tennessee State University located? LSED
A. Murfreesboro
- Q. To prevent concussions when cycling, what piece of equipment should you wear? THES 10.
A. Helmet
- Q. What is the proper name for deer meat? THES 5.1
A. Venison
- Q. What state university was first named Hall-Moody Institute? LSED
A. University of Tennessee at Martin (would accept simply UT-Martin)
- Q. What is an unplanned event that usually results in an injury or damage? THES 10.
A. Accident
- Q. At what temperature should your refrigerator be set? THES 5.1
A. Between 32 degrees and 40 degrees Fahrenheit
- Q. A tornado with wind speeds of 300 miles per hour would be considered what class tornado? THES 11.
A. F-5
- Q. What is the tool used to study color schemes? VA 2.1
A. The Color Wheel
- Q. What mineral helps the thyroid gland to work properly and is usually found in salt? THES 5.1
A. Iodine
- Q. What is a chemical compound essential to good nutrition and bone structure? THES 5.1
A. Mineral

- Q. What are the two readings given in a blood pressure?
A. Systolic (pronounced SISS-TAH-LIC) and Diastolic (pronounced DIE-ISS-TAH-LIC) THES 9.2
- Q. What is the term for a disease that is transmitted to humans by food?
A. Foodborne Illness THES 5.1
- Q. What is the type of knitting done with a long hooked needle?
A. Crochet VA 1.2
- Q. Most fast foods are high in fat and what?
A. Sodium THES 5.1
- Q. What is the type of craft where you paint on a wooden surface?
A. Tole Painting VA 1.3
- Q. What type of fat is liquid at room temperature?
A. Unsaturated THES 5.1
- Q. Which type of cancer kills the most people in the United States?
A. Lung Cancer THES 9.2
- Q. What is the term for predicting what the weather will do?
A. Forecasting THES 11.
- Q. Americans get most of their sodium intake from what ingredient added to foods during processing?
A. Salt THES 5.1
- Q. What vitamin helps your body utilize calcium better?
A. Vitamin D THES 5.1
- Q. What do the letters C P R stand for?
A. Cardiopulmonary Resuscitation (pronounced CAR-DEE-O-PULL-MON-AIR-EE REE-SUS-UH-TAY-SHUN) THES 10.
- Q. What method of cooking comes from the French word meaning "to jump" and is usually done to onions and mushrooms?
A. Saute (pronounced SAW-TAY) THES 5.1
- Q. What was the first of the "normal" schools to enroll students?
A. Middle Tennessee Normal School LSED
- Q. When sewing what is worn on the middle finger of your sewing hand to push the needle through the fabric?
A. Thimble VA 1.1
- Q. What is the term used to describe two images taken at different times appearing on the same photograph?
A. Double exposure VA 1.3

- Q. What is the term for the reduction in the size of particles suspended in a liquid by the use of high pressure? THES 5.1
A. Homogenization (pronounced HUM-AH-GIN-UH-ZAY-SHUN)
- Q. One gram of fat contains how many calories? THES 5.1
A. 9
- Q. What is the meat from young dairy and beef calves? THES 5.1
A. Veal
- Q. In emergency preparedness, what do we call the circular diagram containing the words: Prepare, Respond, Recover, Mitigate? THES 11.
A. The Disaster Cycle
- Q. What is the nutrient needed to prevent anemia? THES 5.1
A. Iron
- Q. What is the phone number for the Tennessee Poison Control Center? THES 11.
A. 1-800-222-1222 or 1-423-222-1222
- Q. What can be added to fruit to prevent it from browning in the freezer? THES 5.1
A. Ascorbic Acid (pronounced AS-SCORE-BIC)
- Q. What is defined as the ratio of lean body weight to fat body weight? THES 5.1
A. Body composition
- Q. What is the term for the exposing of a liquid to high temperatures allowing for the destruction of harmful organisms without major chemical changes to the substance? THES 5.1
A. Pasteurization (pronounced PASS-TER-UH-ZAY-SHUN)
- Q. If you add black to a color to make it darker, you are changing the color's what? VA 2.1
A. Shade
- Q. What grain is pasta made from? THES 5.1
A. Wheat
- Q. What is the term for the drying out of frozen food that has been improperly packaged? THES 5.1
A. Freezer Burn
- Q. As it relates to clothing, why do we use pinking shears? VA 1.1
A. Cutting zig-zag edges on cloth to prevent fraying
- Q. What class tornado would have winds of 100 miles per hour? THES 11.
A. F-1
- Q. Which school in the University of Tennessee system is located in Southeast Tennessee? LSED
A. The University of Tennessee at Chattanooga
- Q. A drug or other substance which produces delusions is called a what? THES 13.
A. Hallucinogen (pronounced HUH-LOOSE-UN-UH-GIN)

- Q. Name the only state university in Tennessee named for a former governor?
A. Austin Peay State University LSED
- Q. What does the size of the lens opening of a camera effect?
A. Depth of field in focus VA 1.1
- Q. Where is the University of Tennessee Space Institute located?
A. Tullahoma LSED
- Q. What is the recommended amount of time for proper handwashing?
A. 20 seconds THES 2.1
- Q. What can be defined as a style that gains sudden popularity and declines quickly?
A. Fad THES 13.
- Q. What is the term for the exceptionally high tides which accompany hurricanes causing much damage?
A. Storm Surge THES 11.
- Q. How are ingredients on a food label listed by nutritional importance?
A. From most to least THES 5.1
- Q. In what town is East Tennessee State University located?
A. Johnson City LSED
- Q. What is a drug which can only be purchased with a physician's order?
A. Prescription Drugs THES 13.
- Q. What is the recommended amount of exercise time a child or teenager should get daily?
A. 60 minutes (revised with 2005 new Food Guide Pyramid) THES 4.1
- Q. What is the woven edge on either side of a piece of fabric?
A. Selvage VA 2.3
- Q. At what time of the day do most lightning deaths occur?
A. Afternoon THES 11.
- Q. What radar system has greatly improved the forecasting of tornados?
A. Doppler THES 11.
- Q. Carbohydrates provide how many calories per gram.
A. 4 THES 5.1
- Q. What is a list of dishes or foods served at a meal?
A. Menu THES 5.1
- Q. What is the statement issued when a Tornado has been spotted?
A. Tornado Warning THES 11.

- Q. In what direction do Tornados generally travel? THES 11.
A. Northeast
- Q. Which school in the University of Tennessee system is located in West Tennessee? LSED
A. The University of Tennessee at Martin
- Q. What should be dialed in case of emergency? THES 11.
A. 911
- Q. Foods high in soluble fiber can lower what substance in your blood? THES 5.1
A. Cholesterol
- Q. What is a picture that is woven in cloth and hung on a wall? VA 1.3
A. Tapestry (pronounced TAP-ISS-TREE)
- Q. What kind of paint is made of powder mixed with glue and water? VA 1.2
A. Tempera
- Q. What part of the basement would be the safest place to be during a tornado? THES 11.
A. Southwest corner (The Northeast corner may pile up with debris)
- Q. What nutrient builds bones and teeth? THES 5.1
A. Calcium
- Q. What color is defined as a pale or light purple? VA 2.1
A. Lavender or Lilac
- Q. What national organization issues weather watches and warnings? THES 11.
A. The National Weather Service
- Q. What is the addictive agent found in Tobacco? THES 13.
A. Nicotine
- Q. What 3 pieces of equipment make up the work triangle in the kitchen? THES 5.1
A. Stove, Sink, Refrigerator
- Q. What is the first responsibility of any baby sitter? THES 10.
A. Safety of the child
- Q. What is the term for the removal of water from food? THES 5.1
A. Dehydrated
- Q. Which state university traces its origins to Blount College founded in 1794? LSED
A. The University of Tennessee
- Q. What are colors called that are opposite each other on the color wheel? VA 2.1
A. Complementary or Contrasting

- Q. What is the standard number for information? THES 11.
A. 411 or 1411
- Q. Concerning interior design, what is the meaning of the word emphasis? VA 2.3
A. Center of interest
- Q. What type of drug produces sleep or stupor while at the same time relieving pain? THES 13.
A. Narcotics
- Q. What is the nutrient of food needed to build and repair body tissues? THES 5.1
A. Protein
- Q. What is the term for something which can be seen through clearly, like glass? VA 2.1
A. Transparent
- Q. Exercise makes your bones what? THES 4.1
A. Stronger
- Q. What is the tool with a sharp point and a small blade that is used to remove stitches from fabric? VA 1.1
A. Seam Ripper
- Q. Name the two types of dietary fiber? THES 5.1
A. Soluble and Insoluble
- Q. What is the term for something that cannot be seen through? VA 2.1
A. Opaque
- Q. What is the term for adding a desirable substance to a food increasing the food value? THES 5.1
A. Fortified
- Q. What was the original name of East Tennessee State University? LSED
A. East Tennessee State Normal School
- Q. What is the largest voluntary health organization in the world? THES 9.2
A. American Cancer Society
- Q. What is the term for the main object you want in your photograph? VA 2.3
A. Subject
- Q. What is the safest method to defrost frozen foods? THES 5.1
A. In the refrigerator
- Q. What type camera lens allows you to frame more area from right to left? VA 1.1
A. Wide-angle lens
- Q. What is a "PFD" as it relates to safety? THES 10.
A. A Personal Flotation Device

- Q. What university in Tennessee was originally known as Grant University?
A. UT Chattanooga LSED
- Q. What is the term for the outer edges of a flat surface?
A. Shape VA 2.1
- Q. What is a substance that prevents bacterial growth called?
A. Antibiotic THES 9.2
- Q. At what temperature should cold foods be stored?
A. 40° F or colder THES 5.1
- Q. What is used in sewing to give shape to a garment by rounding flat fabric to fit curves?
A. Darts VA 1.3
- Q. What state university was at one time known as "T P I?"
A. Tennessee Tech University LSED
- Q. What Nashville university is located on the grounds of the former home of Adelia Acklen?
(Pronounced ADD-UH-LEE-SH-UH ACK-LYNN)
A. Belmont LSED
- Q. What is the most preventable cause of death in our society?
A. Smoking THES 13.
- Q. Oranges, lemons, and tangerines are what kind of fruits?
A. Citrus Fruits THES 5.1
- Q. What university in Tennessee was originally known as Dixie College?
A. Tennessee Tech University LSED
- Q. Emergency responders pay close attention to NOAA weather radio reports in preparing for emergencies. What does NOAA stand for?
A. the National Oceanic and Atmospheric Administration THES 11.
- Q. Sewing items needed to finish a project such as buttons, zippers, thread and snaps are also known as what?
A. Notions VA 1.1
- Q. Why should a person warm up their muscles with stretching exercises?
A. Cold muscles are more prone to injuries THES 4.1
- Q. What is made by putting many motifs together?
A. Pattern VA 2.3
- Q. U. T. was officially named the University of Tennessee in 1879. What was its' name immediately prior to this change?
A. East Tennessee University LSED

- Q. What is the light proof area used for processing film?
A. Darkroom VA 1.1
- Q. What is the name given to an earthquake which follows another earthquake?
A. An Aftershock THES 11.
- Q. In what town is Tennessee Tech University located?
A. Cookeville LSED
- Q. What is the term used to describe the weaving together of three or more cords, wires or string?
A. Braid VA 1.3
- Q. In sewing, what is pivoting?
A. Turning a corner VA 2.1
- Q. What is the name of an art work made by gluing different things down on a flat surface?
A. Collage VA 2.3
- Q. What state university was at one time University of Tennessee Junior College?
A. University of Tennessee at Martin (would accept simply UT-Martin) LSED
- Q. When mowing on slopes with a push mower, in which direction should you mow?
A. Across the slope THES 10.
- Q. What is the term for introducing an undesirable element?
A. Contamination THES 5.1
- Q. When studying colors, what are colors called that contain blue?
A. Cool Colors VA 2.1
- Q. Which class of fire occurs in electrical wiring and electronic equipment?
A. Class "C" fire THES 10.
- Q. What is the name for vitamin B1?
A. Thiamin (pronounced THY UH MUN) THES 5.1
- Q. What is defined as a substance that, when put into your body, can alter the way your body works?
A. Drugs THES 13.
- Q. What is the most important tool you have to prevent foodborne illness?
A. Good personal hygiene THES 2.1
- Q. What is the device in a camera that opens and closes causing the film to be exposed forming an image?
A. Shutter VA 1.1
- Q. Where does Tennessee rank in the nation for childhood obesity?
A. Fifth (5th) Highest! THES 9.2

- Q. What is the most common stitch on a sewing machine?
A. Straight Stitch VA 2.1
- Q. What Tennessee university is located near Sewanee, Tennessee?
A. The University of the South LSED
- Q. What type of drug is alcohol?
A. Depressant THES 13.
- Q. What percent of traffic accidents are alcohol related?
A. 60 percent THES 13.
- Q. What current university was at one time known as Tennessee A & I State Normal College?
A. Tennessee State University LSED
- Q. Which boat has the right of way...a motor boat or a sail boat?
A. The sail boat THES 10.
- Q. At what wind speed does a tropical storm become a hurricane?
A. Above 74 mph THES 11.
- Q. What is the term for the way a surface feels when touched?
A. Texture VA 2.1
- Q. What is the statement issued when conditions are favorable for a Tornado to occur?
A. Tornado Watch THES 11.
- Q. What does the term linear mean?
A. Consisting of lines VA 2.1
- Q. What bugs spread Rocky Mountain Spotted Fever and Lyme Disease?
A. Ticks THES 9.2
- Q. Which class of fire involves flammable liquids, gases, oil and grease?
A. Class "B" fire THES 10.
- Q. What harmful substance is in the paint of most houses built before 1960?
A. Lead THES 10.
- Q. What is the leading cause of infant deaths in Tennessee?
A. Low birth weight THES 9.2
- Q. What type nutrient in food provides energy to the body?
A. Carbohydrates THES 5.1
- Q. What is the first thing you should do upon arriving on the scene of an accident?
A. Secure the scene or make sure the danger is removed or corrected THES 11.

- Q. What type of accident causes the most deaths in the United States?
- A. Motor Vehicles

THES 10.

- Q. What organelle within the cell stores water and other materials? 7.LS1.1
A. The Vacuole (Pronounced Vack-U-ULL)
- Q. What is the universal solvent? 7.PS1.5
A. Water
- Q. What organelle within the cell is responsible for photosynthesis? 7.LS1.1
A. Chloroplasts
- Q. What organelle within the cell is know as the powerhouse of the cell? 7.LS1.1
A. Mitochondria (Pronounced MITE-UH-CON-DREE-UH)
- Q. What is termed as a specific physical characteristic which varies from one individual to another? 7.LS3.2
A. A trait
- Q. If the reactants have a mass 5 grams before a Chemical reaction, what would you expect the product's mass to be? 7.PS1.4
A. 5 grams also
- Q. What are the basic substances which make up the Periodic Table (PEER-E-ODD-TICK)? 7.PS1.5
A. Elements
- Q. A warm-blooded animal that lives in water and breathes with lungs would be classified as a what? 7.LS1.3
A. A mammal
- Q. Chemically speaking a peanut butter and jelly sandwich would be classified as a what? 7.PS1.3
A. A Mixture
- Q. What is the network of canals within the cell use to treansport and store substances? 7.LS1.1
A. Endoplasmic Reticulum (Pronounced IN-DOE-PLAS-MICK REE-TICK-U-LUM)
- Q. Elements arranged in a row on the Periodic Table (PEER-E-ODD-TICK) are called what? 7.PS1.5
A. Periods
- Q. What is the term for when a parent cell splits into two identical offspring cells? 7.LS1.7
A. Binary Fission
- Q. Chemically speaking soil would be classified as a what? 7.PS1.3
A. A Mixture
- Q. Toads having long sticky tongues is an example of what type of Adaptation (ADAP-TAY-SHUN)? 7.LS1.6
A. Structural Adaptation
- Q. Animals produce Carbon Dioxide during what process? 7.LS1.9
A. Respiration
- Q. What are the fundamental particles which make up matter? 7.PS1.1
A. Atoms

- Q. Which type of cell would have cilia?
A. Animal Cells 7.LS1.1
- Q. From a chemical standpoint how would you classify the substance NaCL (N-A-C-L)?
A. A compound 7.PS1.5
- Q. What are the building blocks of all life?
A. Cells 7.LS1.3
- Q. The element Chlorine is designated on the Periodic Table (PEER-E-ODD-TICK) as what?
A. Cl 7.PS1.5
- Q. What structure in the cell is responsible for storing the cells DNA?
A. The nucleus 7.LS1.1
- Q. Shredding paper would be an example of what kind of change?
A. Physical Change 7.PS1.5
- Q. From a chemical standpoint how would you classify the substance CO2 (C-O-2)?
A. A compound 7.PS1.5
- Q. The rusting of iron would be an example of what kind of change?
A. Chemical Change 7.PS1.5
- Q. A Black Bear hibernating in the winter is an example of what type of Adaptation (ADAP-TAY-SHUN)?
A. Behavioral Adaptation 7.LS1.6
- Q. The toxicity and the flammability of a substance would be examples of what property?
A. Chemical Property 7.PS1.5
- Q. Related to the Periodic Table (PEER-E-ODD-TICK) how are elements which have no metallic properties classified?
A. Nonmetals 7.PS1.5
- Q. From a chemical standpoint how would you classify the substance H2O (H-2-O-)?
A. A compound 7.PS1.5
- Q. What is a substance consisting of two or more atoms from different elements that can be separated by physical means?
A. A Mixture 7.PS1.3
- Q. Which type of cell would have Lysosomes?
A. Animal Cells 7.LS1.1
- Q. What organelle within the cell breaks down food molecules and dead or injured cells?
A. Lysosome (Pronounced LIE-SO-SOAM) 7.LS1.1
- Q. What is the term for the water movement through plants?
A. Transpiration (pronounced TRANS-PER-RAY-SHUN) 7.LS1.9

- Q. Balling up a sheet of aluminum foil would be an example of what kind of change?
A. Physical Change 7.PS1.5
- Q. What is a substance required to start a chemical reaction?
A. Reactant 7.PS1.4
- Q. What is a substance which has properties different than its componets?
A. A Compound 7.PS1.3
- Q. What is a variant form of a given gene?
A. An Allele (UH-LEAL) 7.LS3.2
- Q. What is the jellylike fluid inside the cell in which the organelles are suspended?
A. Cytoplasm 7.LS1.1
- Q. Elements arranged in a column on the Periodic Table (PEER-E-ODD-TICK) are called what?
A. Groups 7.PS1.5
- Q. What are the building blocks of all life?
A. Cells 7.LS1.1
- Q. Chemically speaking table salt would be classified as a what?
A. A Compound 7.PS1.3
- Q. Binary fission is an example of what type of reproduction?
A. Asexual Reproduction 7.LS1.7
- Q. What organelle within the cell provides energy for celluar respiration?
A. Mitochondria (Pronounced MITE-UH-CON-DREE-UH) 7.LS1.1
- Q. Which two gasses make up the greatest percentage of the atmosphere of the Earth?
A. Oxygen and Nitrogen 7.ESS3.1
- Q. What structure is responsible for the support and protection of the plant cell?
A. Cell wall 7.LS1.3
- Q. In terms of shape what is the difference in plant cells and animal cells?
A. Plant Cells are rectangular Animal cells are round 7.LS1.1
- Q. In terms of shape what is the difference in plant cells and animal cells?
A. Plant Cells are rectangular Animal cells are round 7.LS1.3
- Q. What is a phenotype? (pronounced FEAN-O-TYPE)
A. An animals physical characteristics 7.LS3.2
- Q. The element Hydrogen is designated on the Periodic Table (PEER-E-ODD-TICK) as what?
A. H 7.PS1.5

- Q. What regulates passage of materials in and out of the the cell nucleus? 7.LS1.1
A. Nuclear Membrane
- Q. Plants basiclly breathe in what and exhale what? 7.LS1.9
A. Breathe in Carbon Dioxide and exhale Oxygen
- Q. The element Potassium is designated on the Periodic Table (PEER-E-ODD-TICK) as what? 7.PS1.5
A. K
- Q. Which type of cell would have Lysomes? 7.LS1.3
A. Animal Cells
- Q. A single celled organism lacking a membrane -bound nucleus or organelles would be classified as a what? 7.LS1.7
A. Prokaryote (pronouned PRO-CARRY-OAT)
- Q. What is the threadlike structure of nucleic acids found in the nucleus of the cell which carries genetic information? 7.LS3.2
A. Chromosome (Pronounced K-ROAM-UH-SOAM)
- Q. Chemically speaking water would be classified as a what? 7.PS1.3
A. A Compound
- Q. What are the three main structures of a cell? 7.LS1.1
A. Membrane, nucleus, cytoplasm
- Q. What is a trait which allows an organism to survive and reproduce in its environment? 7.LS1.6
A. Adaptation (ADAP-TAY-SHUN)
- Q. The scientific law that basiclly states that mass can neither be created or destroyed is known as what? 7.PS1.4
A. Law of Conservation of Mass
- Q. What organelle within the cell produces proteins? 7.LS1.1
A. Ribosomes (Pronounced RIBE-O-SOAMS)
- Q. Chemically speaking baking soda would be classified as a what? 7.PS1.3
A. A Compound
- Q. What structure is responsible for the support and protection of the plant cell? 7.LS1.1
A. Cell wall
- Q. Melting and ice cube would be an example of what kind of change? 7.PS1.5
A. Physical Change
- Q. Why is Helium a safer substance to use in a Blimp than Hydrogen? 7.PS1.5
A. It is less Reactive (therefore less flammable)
- Q. The element Sodium is designated on the Periodic Table (PEER-E-ODD-TICK) as what? 7.PS1.5
A. Na

- Q. Which type of cell would have one large central vacuole? (Pronounced VACK -U- UL) 7.LS1.3
A. Plant Cells
- Q. What is the table which arranges the chemical elements into groups and properties? 7.PS1.5
A. The Periodic Table (PEER-E-ODD-TICK)
- Q. The color or texture of a substance would be examples of what property? 7.PS1.5
A. Physical Property
- Q. What is the change which affects the size, shape, or color of a substance but does not affect its composition? 7.PS1.5
A. A Physical Change
- Q. An actual change in the physical make-up of an organism to aid in survival is what kind of adaptation (ADAP-TAY-SHUN)? 7.LS1.6
A. Structural Adaptation
- Q. What structure is responsible for the support and protection of the animal cell? 7.LS1.1
A. Cell membrane
- Q. What is another term for having a variety of life in a given place? 7.LS1.6
A. Biodiversity (BYO-DUH-VERSE-UH-TEE)
- Q. Fragmentation (Pronounced Frag-MENT-TAY-SHUN) is an example of what type of reproduction? 7.LS1.7
A. Asexual Reproduction
- Q. What structure is responsible for the support and protection of the animal cell? 7.LS1.3
A. Cell membrane
- Q. Elements that are similar would be found where in the Periodic Table (PEER-E-ODD-TICK)? 7.PS1.5
A. In the same column
- Q. Candian Geese flying south in the winter is an example of what type of Adaptation (ADAP-TAY-SHUN)? 7.LS1.6
A. Behavioral Adaptation
- Q. The element Gold is designated on the Periodic Table (PEER-E-ODD-TICK) as what? 7.PS1.5
A. Au
- Q. What are gases which are odorless, colorless and react very little with other elements? 7.PS1.5
A. Noble Gases
- Q. Migration is an example of what kind of adaptation? 7.LS1.6
A. Behavioral
- Q. What is classified as an animal that has a head, a thorax, and abdomen? 7.LS1.3
A. An Insect

- Q. Female birds having colors that blend in more with their surroundings is an example of what type of Adaptation (ADAP-TAY-SHUN)? 7.LS1.6
A. Structural Adaptation
- Q. What is the term for when a parent cell forms a bubble-like bud that when fully developed breaks away and forms a new organism? 7.LS1.7
A. Budding
- Q. What is approximately equal to the number of protons and neutrons found in an atom? 7.PS1.5
A. Atomic Mass
- Q. What structure is responsible for coordinating growth, metabolism, and the reproduction of the cell? 7.LS1.1
A. The nucleus
- Q. What is the cell wall of a plant composed of? 7.LS1.1
A. Cellulose
- Q. Within a period of the Periodic Table (PEER-E-ODD-TICK) what increases from left to right? 7.PS1.5
A. The Atomic Number
- Q. What type of reproduction will combine the genetic material of two parents? 7.LS1.7
A. Sexual Reproduction
- Q. What is the study of Heredity called? 7.LS3.2
A. Genetics
- Q. What is a substance consisting of two or more atoms from different elements bound together chemically? 7.PS1.3
A. A Compound
- Q. The total amount of matter found in an atom is designated as that atom's what? 7.PS1.5
A. Atomic Mass
- Q. Burning wood would be an example of what kind of change? 7.PS1.5
A. Chemical Change
- Q. A section of DNA which codes a specific trait is known as what? 7.LS3.2
A. A Gene
- Q. What is the cell wall of a plant composed of? 7.LS1.3
A. Cellulose
- Q. What organelle within the cell contains the DNA? 7.LS1.1
A. Nucleus
- Q. A group of animals that are more like each other than they are alike any other group of animals are called what? 7.LS1.3
A. A species

- Q. Atoms will react chemically in the same way if they are in the same what? 7.PS1.5
A. The same group or family
- Q. What organelle within the cell is considered the brain of the cell? 7.LS1.1
A. Nucleus
- Q. What type of reproduction produces offspring identical to one parent? 7.LS1.7
A. Asexual Reproduction
- Q. Chemically speaking air would be classified as a what? 7.PS1.3
A. A Mixture
- Q. What type cell has a cell wall? 7.LS1.1
A. Plant Cell
- Q. What is the basic unit of all living things? 7.LS1.1
A. Cells
- Q. The element Carbon is designated on the Periodic Table (PEER-E-ODD-TICK) as what? 7.PS1.5
A. C
- Q. A opossum playing dead is an example of what kind of adaptation? 7.LS1.6
A. Behavioral
- Q. What a term for the genetic material of a given organism? 7.LS3.2
A. Genome (GEE-NOAM)
- Q. What is a zygote? (Pronounced ZI-GOAT) 7.LS3.2
A. A fertilized egg
- Q. Plants produce oxygen during what process? 7.LS1.9
A. Photosynthesis
- Q. What is the term for when a parent organism breaks into pieces and each piece becomes a new organism? 7.LS1.7
A. Fragmentation (Pronounced Frag-MENT-TAY-SHUN)
- Q. A cheetah having long legs and a light build is an example of what type of Adaptation (ADAP-TAY-SHUN)? 7.LS1.6
A. Structural Adaptation
- Q. Which two gasses make up the greatest percentage of the atmosphere of the Earth? 7.ESS3.1
A. Oxygen and Nitrogen
- Q. Which type of cell would have one large central vacuole? (Pronounced VACK -U- UL) 7.LS1.1
A. Plant Cells
- Q. What are tiny cell structures that carry out specific functions within the cell? 7.LS1.1
A. Organelles

- Q. What structure in the cell is responsible for storing the cells DNA? 7.LS1.3
A. The nucleus
- Q. What is classified as an animal that is cold-blooded and is covered with scales? 7.LS1.3
A. A Reptile
- Q. What is the term for the number of protons found in the nucleus of an atom? 7.PS1.5
A. The Atomic Number
- Q. What is a substance that is produced from a chemical reaction? 7.PS1.4
A. Product
- Q. What is a one or two letter notation used to represent an atom of a particular element? 7.PS1.5
A. Chemical Symbol
- Q. What are the three main structures of a cell? 7.LS1.3
A. Membrane, nucleus, cytoplasm
- Q. Vultures having a bald head and a good sense of smell is an example of what type of Adaptation (ADAP-TAY-SHUN)? 7.LS1.6
A. Structural Adaptation
- Q. The element Oxygen is designated on the Periodic Table (PEER-E-ODD-TICK) as what? 7.PS1.5
A. O
- Q. A difference between members of the same population is a what? 7.LS1.6
A. Variation
- Q. What is classified as an animal that is cold-blooded is able to live in both water and on land? 7.LS1.3
A. Amphibian
- Q. What type cell has a cell wall? 7.LS1.3
A. Plant Cell
- Q. An organism whose cells have a cell nucleus and other organelles enclosed in membranes would be classified as what? 7.LS1.7
A. Eukaryote (pronounced U-CARRY-OAT)
- Q. Digesting food would be an example of what kind of change? 7.PS1.5
A. Chemical Change
- Q. What is a cellular structure in an animal cell that helps organize cell division? 7.LS1.1
A. Centriole
- Q. The element Iron is designated on the Periodic Table (PEER-E-ODD-TICK) as what? 7.PS1.5
A. Fe
- Q. What is a diagram that can be used to determine the probability of an offspring having a particular genotype? 7.LS3.2
A. Punnett Square (Pronounced PUN-ET)

- Q. Which type of cell would have cilia? 7.LS1.3
A. Animal Cells
- Q. Animals basically breathe in what and exhale what? 7.LS1.9
A. Breathe in Oxygen and exhale Carbon Dioxide
- Q. Zebras herding together to protect the herd is an example of what type of Adaptation (ADAP-TAY-SHUN)? 7.LS1.6
A. Behavioral Adaptation
- Q. What is classified as an animal that has hair and gives birth to their young and feeds them milk? 7.LS1.3
A. A mammal
- Q. What is classified as an animal that is cold-blooded and breathes with gills in the water? 7.LS1.3
A. A Fish
- Q. An action taken by the organism to aid in survival is what kind of adaptation (ADAP-TAY-SHUN)? 7.LS1.6
A. Behavioral Adaptation
- Q. What is a genotype? (pronounced JEAN-O-TYPE) 7.LS3.2
A. The genetic makeup of an organism?
- Q. From a chemical standpoint how would you classify the substance Fe (F-E)? 7.PS1.5
A. An element
- Q. The element Nitrogen is designated on the Periodic Table (PEER-E-ODD-TICK) as what? 7.PS1.5
A. N
- Q. Which type of reproduction would produce an offspring that is genetically unique? 7.LS1.7
A. Sexual Reproduction
- Q. What structure is responsible for coordinating growth, metabolism, and the reproduction of the cell? 7.LS1.3
A. The nucleus
